

CAN Calibration Protocol on CAN Bus

Mihuț Adrian

Abstract

This document is inspired from my graduation project: Software for protocols calibration on CAN bus, coordinated by Lecturer Mr. Gabriel Chindris. After I made the research necessarily for the project, I realized that CCP is a very important protocol, because it is used in automotive industry and is based on CAN. This document summarize as short as possible the protocol. The purpose is that the reader of this article should know the basics of the protocol, the utility and it could be used in future applications or projects development.
